

## **Our Services**

### **Website Design**

From simple to complex, we can bring practically any website to life. Our web development cycle is short and can produce great websites at affordable prices.

Here are some of the technologies we use:

- PHP programming for dynamic web pages
- SQL databases
- Perl scripting
- JavaScript

We can also provide easy web-based management so you can update the content of your Web Pages in a snap.

Come visit our website to find out more and browse through our portfolio.

### **Website Hosting**

If you need to:

- Obtain a domain name
- Get your website hosted on the internet
- Get your website registered on practically all the search engines on the Internet

And if you don't want to spend days learning how to do all of the above, let us take care of your website hosting!
